Profile

Steady operator who keeps work moving when priorities shift and processes are not fully defined. I organize workflows, document decisions, and follow through on details that keep execution on track. My background across Apple, technical recruiting, and property technology has shaped a practical, execution-focused approach to work. Outside of work, I build personal projects on my website and practice front-end coding and 3D modeling hands-on.

Professional Experience

Ambient Property Technologies | Client Account Support Specialist | Remote

Jan 2024 - Present

- Took ownership of complex client workflows across 10+ properties, supporting day-to-day operations in a fast-scaling property technology environment.
- Documented workflows, tracked recurring issues, and coordinated follow-ups across internal teams, helping reduce operational delays and rework by an estimated 20–30%.
- Managed a high-volume support queue (40–60 cases/day) while maintaining accurate case tracking and clear communication with clients and cross-functional teams.
- Expanded beyond core support responsibilities to assist recruiting operations, supporting interview scheduling, coordination, and candidate evaluations through Greenhouse.

Merge IT | Resource Manager | Remote

Feb 2022 - Jan 2024

- Transitioned from retail into technical recruiting, developing a working understanding of IT roles and hiring needs while supporting enterprise clients including Disney, Morgan Stanley, and Johnson & Johnson.
- Managed full-cycle recruiting for contract and contract-to-hire roles, serving as the primary point of contact for 20–30 active candidates across multiple client accounts.
- Coordinated interview scheduling, feedback collection, and candidate communication to keep hiring processes moving efficiently in fast-paced, competitive markets and minimize candidate drop-off.
- Guided candidates through technical interview processes by coordinating scheduling and feedback, clarifying expectations, and adapting sourcing strategies for hard-to-fill and remote roles to keep pipelines moving.

Apple Inc. | San Francisco & Mission Viejo, CA

Product Specialist | Product Expert | Store Lead | Technical Expert

Nov 2016 - Feb 2022

- Promoted through four roles over five years, taking on increasing responsibility for technical problem solving, execution support, and high pressure customer situations in high volume retail environments.
- Became a trusted escalation point for complex iOS and macOS issues, regularly handling cases that required deeper technical judgment and calm decision making.
- Played a key role during major product launches, supporting floor coordination, real time issue resolution, and customer flow to keep the experience steady during sustained volume surges.
- Partnered closely with store leadership to stabilize daily operations during peak periods, helping teams adjust quickly as priorities, staffing, and customer demand shifted.

- Set the tone on the floor by modeling strong customer engagement, technical accuracy, and pacing, informally supporting newer team members as they ramped up.
- Known for translating technical complexity into clear, confident guidance, helping customers leave feeling supported and reducing repeat visits tied to unresolved issues.

Education

Bachelor of Science in Public Health

San Francisco State University - San Francisco, CA

Skills

- Project documentation & status tracking
- Meeting coordination & scheduling
- Workflow documentation & process improvement
- Client account support & case resolution
- Onboarding systems & enablement
- Internal tooling and macro optimization
- Ticketing & case management systems
- Queue management and escalation handling
- Recruiting operations & interview coordination
- Applicant Tracking Systems (Greenhouse)
- iOS / macOS environment support
- HTML, CSS, JavaScript (foundational)
- Visual Studio Code
- Blender (3D modeling and scene setup)
